

## **Table 2 - Petrol Filling Stations 2023 Practice Note**

### **Valuation Scale to be applied to Low Margin Fuel Card (LMFC) Throughput**

<b>Low Margin Fuel Card (LMFC)</b>	
<b>Throughput in million litres (FMRT plus weighted LMFC)</b>	<b>Price per 1,000 litres to be applied to LMFC throughput</b>
0.25 - 1.25	£1.38
1.50	£1.50
2 - 3	£1.63
4	£1.97
5	£2.19
7 - 8	£2.63
10	£2.75
11 - 13	£2.81
14	£2.88
18	£3.13
19	£3.25
20 plus	£3.38

The table shows the £/000 litres to be applied to the Low Margin Fuel Card (LMFC) throughput which varies according to the total of the Fair Maintainable Retail Throughput (FMRT), plus the weighted Low Margin Fuel Card (LMFC) throughput.

The £/000 litres to be applied should be interpolated on a straight-line basis between the maintainable volume thresholds (FMRT plus weighted LMFC).
